SLIDE 1

SLIDE 1

The long-term efficacy and safety outcomes of RHA® with lidocaine are applicable to RHA® with mepivacaine and have shown no significant impact on gel properties, including rheology and degradation profile.

#### RHA® Collection of Fillers, by Teoxane

##### Approved Uses

The Teoxane RHA® Collection of resilient hyaluronic acid (HA) fillers includes RHA Redensity®, RHA® 2, RHA® 3 and RHA® 4.

RHA Redensity® is for injection into the facial tissue for the correction of moderate to severe dynamic perioral rhytids; and RHA® 2 and RHA® 4 are for the correction of moderate to severe dynamic facial wrinkles and folds, such as nasolabial folds, in adults 22 or older. RHA® 3 is for the correction of moderate to severe dynamic facial wrinkles and folds, such as nasolabial folds, and also used to augment lip fullness in adults 22 or older.

##### IMPORTANT SAFETY INFORMATION

Are there any reasons why I should not receive any RHA® injectable gel formulation?

Do not receive if you have a history of multiple severe allergies or severe allergic reactions; if you are allergic to lidocaine or mepivacaine or gram-positive bacterial proteins; or if you have a bleeding disorder.

##### What precautions should I discuss with my doctor?

- Tell your doctor if you are pregnant or breastfeeding as the safety of these products for use during pregnancy or while breastfeeding has not been studied
- Tell your doctor if you have a history of excessive scarring, keloid formations or pigmentation disorders, as use of these products may result in additional scars or changes in pigmentation
- Tell your doctor if you are planning laser treatments or a chemical peel, as there is a possible risk of inflammation at the treatment site if these procedures are performed after treatment
- Tell your doctor if you are on immunosuppressive therapy used to decrease your immune response, as use of these products may
