Accra, Ghana | +233 550 202 871 | langfordquarshie21@gmail.com | www.langford.lol | GitHub @langf00rd

PROFESSIONAL SUMMARY

Experienced Frontend Engineer with 6+ years of experience in building high-performance web apps. Expert in React, Next.js, TypeScript, and Tailwind CSS. Skilled in crafting pixel-perfect, responsive designs and optimizing performance. Passionate about SEO, complex state management, and seamless interactivity. Ready to drive innovation in dynamic teams.

TECHNICAL SKILLS

- Languages & Frameworks: JavaScript, TypeScript, React, Next.js, Node.js, Express.js, Flutter, React Native
- Frontend Tools: HTML, CSS, Tailwind CSS, Figma
- Databases: MongoDB, SQL, Postgres, Supabase
- DevOps & Workflow: Git, CI/CD, Agile methodologies, Firebase
- Other: SEO Optimization, Responsive Design, REST API Integration

PROFESSIONAL EXPERIENCE

Frontend Developer

Komodo Platform – Remote, Europe | Aug 2024 – May 2025
- Upgraded the company's website to a modern, SEO-optimized version, ensuring alignment with Figma designs.
- Developed an integrated code playground, enabling users to test blockchain APIs directly within the documentation.
- Implemented browser cross-window communication, managing complex state and data flow between documentation and the playground.

Lead Frontend Engineer

Christiania Glasmagasin – Remote, Norway | Dec 2023 – Jul 2024
- Led the e-commerce platform revamp from PHP to React/Next.js, increasing load speeds by 3x and achieving top SEO rankings.
- Managed a team of developers, assigning tasks and ensuring smooth transitions from code to production.
- Collaborated with cross-functional teams in an agile environment to deliver iterative improvements.
- Translated Figma designs into responsive, pixel-perfect interfaces to enhance the user experience across devices.

Frontend Engineer

TV Anywhere Africa – Hybrid, Ghana | Oct 2022 – Dec 2023
- Developed multiple video streaming web applications, serving over 10,000 monthly users all over Africa.
- Integrated subscription-based payment gateways like Flutterwave, Paystack, and MTN Mobile Money for seamless transactions.
- Engineered a DRM-enabled HLS video player to protect licensed content and enhance user experience.

Lead Frontend Engineer

Openwaver Tech LTD – Remote, Nigeria | Mar 2021 – Sep 2022
- Developed a web app and integrated smart contracts for an NFT project, achieving a sell-out and generating over $30,000 in revenue.
- Deployed smart contracts to the Ethereum blockchain and built projects deployed on other chains like Solana.
- Utilized SEO optimization strategies to improve website rankings in search results.
- Integrated smart contracts and third-party Web3 tools into decentralized applications for enhanced functionality.

PROJECTS

DraxFit – E-commerce Web App [www.draxfit.com]
Developed and managed a fast-loading, SEO-optimized e-commerce site for one of Korea's largest gym equipment brands, reaching 605K page views. Integrated CMS for easy updates and added multi-language support for broader accessibility.

CruxMusic Global – Music Distribution Web App [www.app.cruxmusic.global]
Built a platform for artists to upload songs, manage submissions, and track distribution. Upgraded from Google Sheets to an automated web app, improving efficiency and user experience.

ADDITIONAL INFORMATION

- Availability: Open to remote or hybrid roles
- Languages: Fluent in English
- Work Preference: Full-time, part-time, or freelance contracts
